What is the most recent version of Spirion (formerly Identity Finder)?

Q: What is the most recent version of Spirion (formerly Identity Finder)?

Answer

As of June 9, 2017

For Mac: version 9.1.1
For Windows: version 9.1.4

The newest version largely contains performance and error-handling improvements over prior versions. This version also contains the ability to create custom types of sensitive data and search for those in addition to the pre-defined sensitive data types Identity Finder has always supported.
