What Does This User Macro Do?

Where Is This Macro Used?

Macro Settings

Macro name:	comment
Macro has a body:	true
Body processing:	Escape HTML in macro body
Output:	Macro generates HTML markup

Source Code

```
## last updated: 9/1/08 by: othomas
## comment macro allows for embedding comments in wiki markup
## The macro will simply not print any body content. However
## if the optional parameter asHTML is passed it will print
## body content formatted as an HTML comment.
##
## Note: Should really escape HTML in $body to make this
## completely safe.
#if($param0)
<!--
$body
-->
#end
```
