Overview

LastPass is a password management system that removes the inconvenience of remembering all of your passwords and increases security.

IS&T has completed licensing LastPass service for use by the entire MIT community, and will provide the MIT community with use of their premium password service and convenient access to data via Windows, MacOS, Linux and mobile native clients as well as via any web browser.

Benefits and Key Features

- Access data and passwords via Windows, Mac OS X, and mobile native clients, as well as any web browser.
- Convenient solution for the password problem of teams.
- Unlocks features such as shared password folders with customized permissions and secure notes for digital recordkeeping allow you to share passwords securely with other users.

How to Obtain/Access

Data stored in LastPass can be accessed via the LastPass website or a browser plugin. LastPass downloads are listed for each platform below:

- Download LastPass for Windows
- Download LastPass for Mac
- LastPass for Linux
- LastPass for Mobile Devices

Visit the registration portal to activate your LastPass Enterprise account.

How to Use

- What do I need to know about using LastPass at MIT?
- LastPass User Manual
