# Change Requests

**SAPweb HR Transactions**

# Table of Contents

# Course Objectives

This course will introduce you to the SAPweb HR Change Transaction requests.  Currently, requests for appointment changes, such as Change in Time, Change in Appointment End Date, Transfers, and Promotions are managed by completing a static web form or Excel file, which is routed for approval, and delivered to the HR Payroll Service Center for manual entry in SAP.  Benefits of the new SAPweb Change transactions include streamlined processes based on employee eligibility, validation, and enforcement of required fields.

Upon completion of this course you will:

√   Know when to check with Compensation for any necessary approvals prior to creating a Change request.

√   Know what data should be gathered for successful completion of a Change transaction.

√   Be able to select the appropriate Change transaction, Type, and Reason.

√   Understand SAPweb HR Change transaction authorization roles and approval workflow.

√   Be able to complete a Change transaction request for an employee within or outside of your area of responsibility.

# 1

# Getting Started with SAPweb Change Transactions

# 1-A : Overview of SAPweb Changes

SAPweb Change transactions are used to modify an MIT employee's current appointment, transfer an employee into a new position in a new DLC, assign an employee to a concurrent position, etc.

You may need to submit more than one Change transaction to effect multiple actions. For example, if an employee with a temporary appointment is being changed to regular staff, and given a salary increase, you will complete **Change in Status**, and **Change in Salary.**

> **NOTE**: Some transaction terminology has changed to better align with existing SAP and Data Warehouse terminology. Please read the list of Change Transactions and descriptions provided below to ensure selection of the correct Transaction.

**Changes (Promotions, Transfers, etc.)** includes transferring employees into your area of responsibility, change in status, change in time, directory title change, reclassification, salary change, change in position (lateral), promotion, delimit appointment (multiple appointments only), and set up concurrent appointment.

**Extend Appointment no salary change** for Non-Academic and Academic appointments. Extend appointment with no change in salary.

**Extend Appointment w/salary increase (Reappoint with salary increase)** Academic appointments only. Extend with a salary increase

**Other Actions** includes Visa changes, Dept. Head appointments, Change in pay basis, Reorganization, Confidential employee action, and Set up concurrent appt – dual.

Change transaction Types and Reasons will be available for selection based on the eligibility of the selected employee appointment (i.e., Academic, Other Academic, Exempt, Non-exempt).

# 1-B : Prior to Creating a Change Transaction

Prior to accessing SAPweb to create a Change request:

- Complete data gathering of data elements required for completion of the specific Change Transaction Type (i.e., Cost Object, Position Title/Number).

- Make sure you have received any required approvals.  For example, before submitting a Reclassification for a Non-Academic appointment, a conversation with your Human Resources Officer and/or the Compensation Office must take place so you will have the appropriate information to complete this form.

- Know the correct Change transaction to select for submission. You may be required to process more than one transaction to complete several changes to the appointment.

- If you have any questions, check with your assigned HRO, HR Compensation, or the HR Payroll Service Desk.   For a complete list of Change transaction Types that require approval from Compensation, see **Appendix A**.

# 1-C : Authorization Roles and Approvals

There are several Authorization Roles for SAPweb HR Change transactions. Staff with either **Initiator** or **Initiator & DLC Approver** authorization may create a Change request. Change requests submitted by a user with Initiator only authorization will be routed to the DLC Approver for approval. Changes to academic appointments also require approval from the Dean's Office. Many Changes to Non-Academic appointments require approval from HR Compensation. All approvals take place prior to the Change request being sent to the HR-Payroll Service Center for processing.

### Initiator
- Create Change request
- Access HR Transaction Inbox
- Correct an HR Transaction
- View an HR Transaction

### DLC Approver

- Approve or Reject Change request created by Iniator
- Add Comments for Rejection

### Dean's Office Approver
- Approve or Reject Change request initiated for employee with Academic appointment
- Add Comments for Rejection

### Compensation

- Add comments for Rejections

### HRO
