How do I reset licensing information in X-Win32?

Q:How do I reset licensing information in X-Win32?

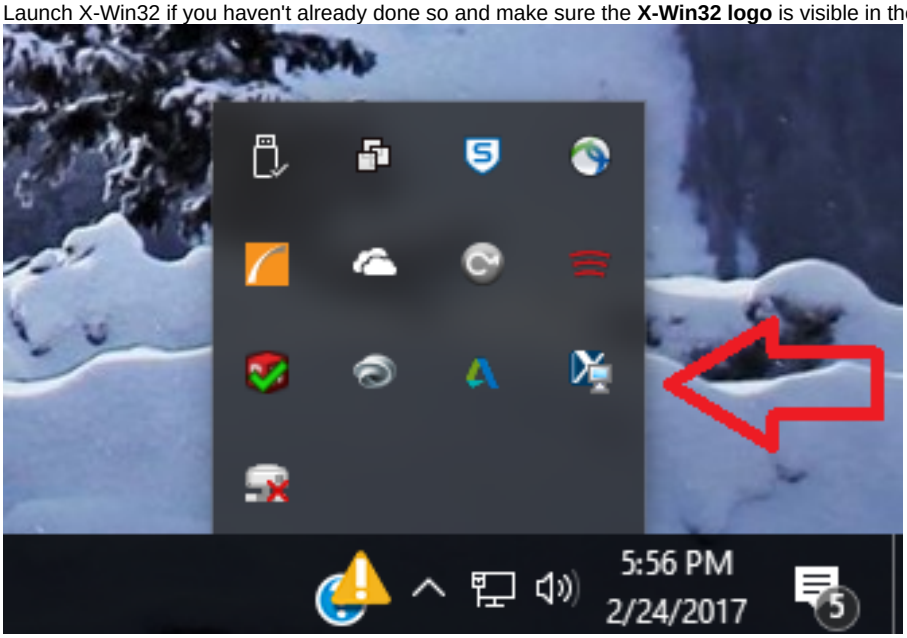
- This article will instruct users on updating or editing standalone license information in an existing installation of X-Win32

Context

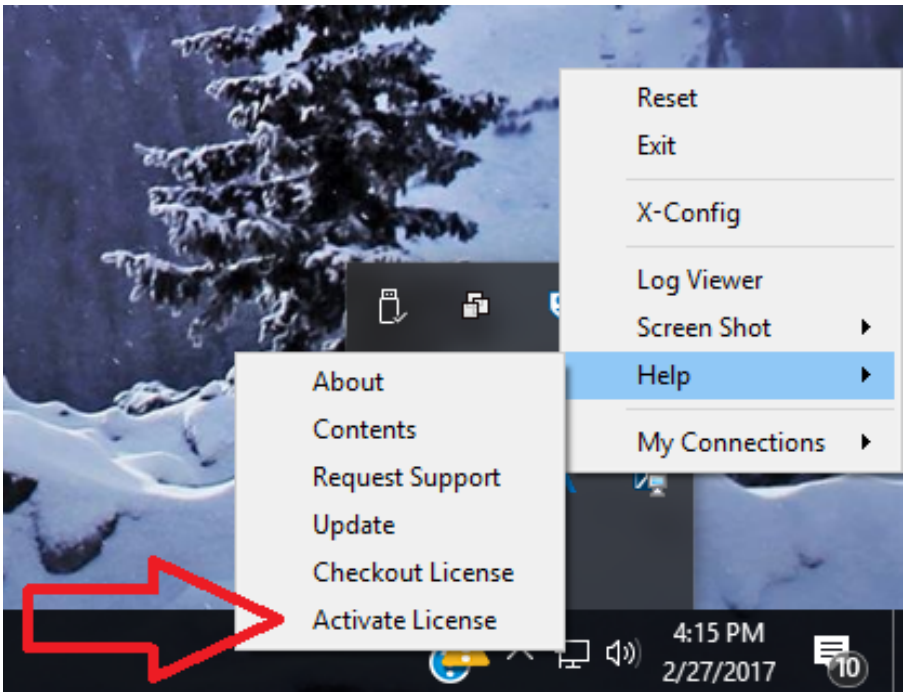
- Starnet's X-Win32 is an advanced PC X server and X emulator that runs on Windows Machines

Answer

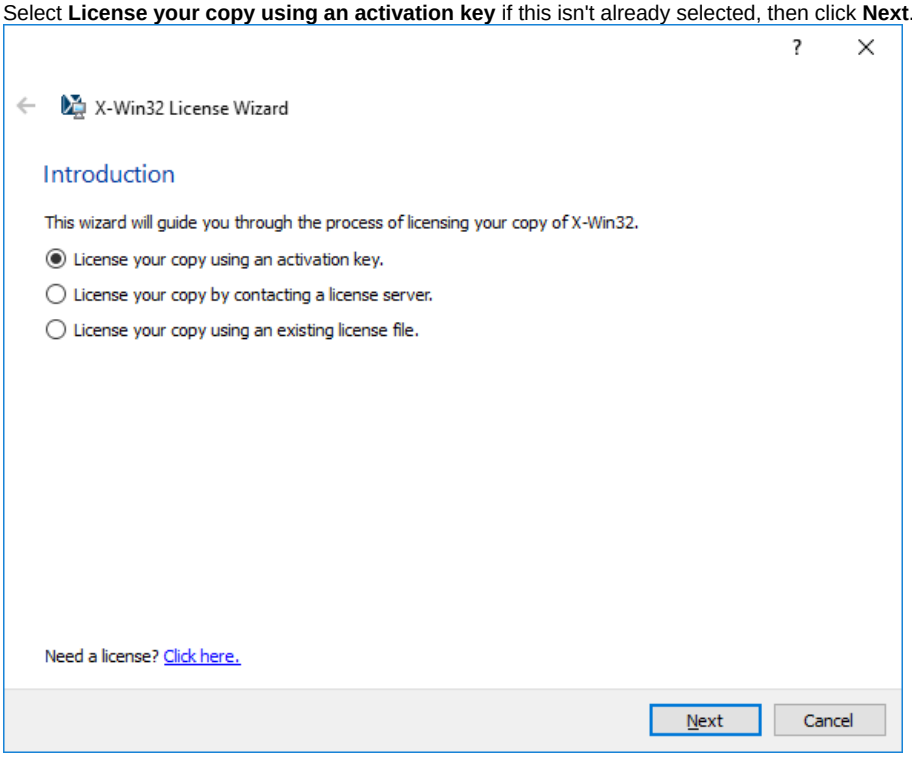
1. Launch X-Win32 if you haven't already done so and make sure the **X-Win32 logo** is visible in the Windows System Tray.



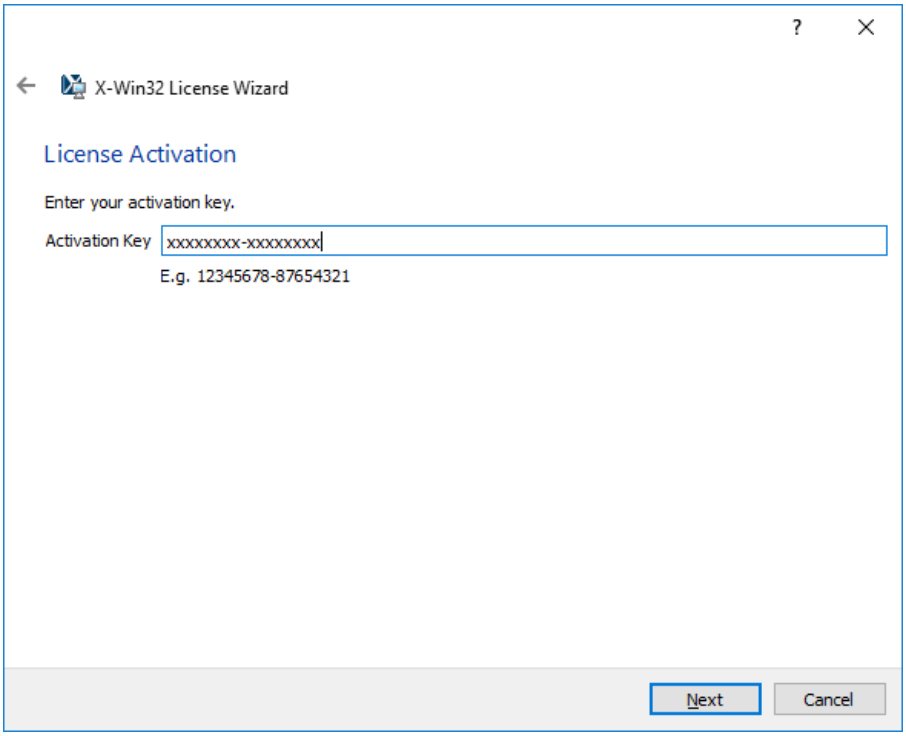
2. Right-click on the X-Win32 logo and Select the menu **Help -> Activate License**.



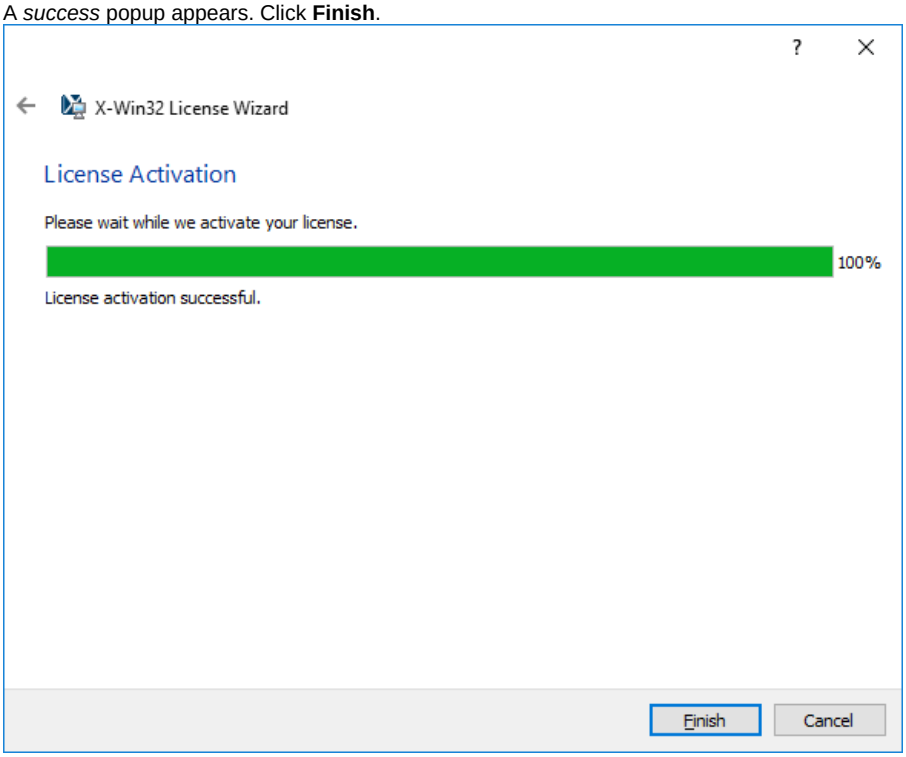
3. Select **License your copy using an activation key** if this isn't already selected, then click **Next**.



4. Enter the activation key and click **Next**.



5. A *success* popup appears. Click **Finish**.



Result: your license information has been updated

Your license information is stored in file **%LOCALAPPDATA%\StarNet Communications\X-Win32\license.lic**
