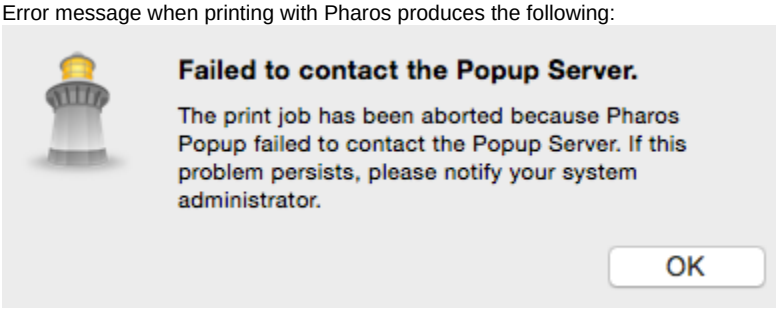
Failed to contact the Popup Server

Failed to contact the Popup Server

Error message when printing with Pharos produces the following:



"Failed to contact the Popup Server.

The print job has been aborted because Pharos Popup failed to contact the Popup Server. If this problem persists, please notify your system administrator."

Cause

The above error is a result of trying to print using Pharos while connected to the "MIT GUEST" wifi network. "MIT" and "MIT SECURE" will work.
