Adding Links to Your Drupal Page

Adding Links to Your Drupal Page

You can create a link to a web page which will open in the current browser tab. You can specify that the new link opens in a separate tab or window.

Creating a Link

1. Select the link text or image, or click where you would like the link to appear.
2. Click the **Link** icon in the toolbar. The Link window opens.
3. Type or paste the target URL.
4. Click the **Target** tab to select a new behavior (e.g., Open in new window).
5. Click **OK**. Click **Save**, then test the link.
