How can I remove the Content Management block in Drupal?

Question: How can I remove the Content Management block in Drupal?

Answer:

Content Management which appears in the Sidebar first region on the left is a block. Blocks may be easily disabled removing them from view. Disabled blocks appear at the bottom of the Blocks overlay screen.

1. From the Admin menu click **Structure** then **Blocks**.
2. In the *Sidebar one* region, locate the Content Management block.
3. In the Regions popup list select *None*.
4. Click **Save blocks**.

> If you remove the Content Management block and its links you may want to begin using the Shortcuts menu to store your frequently accessed pages.
