## What are the Known Issues in Windows 10?

**Q:** What are the Known Issues in Windows 10?

**Answer**

<table>
<thead>
<tr>
<th>Software</th>
<th>Issue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Abaqus</td>
<td>Abaqus will not install correctly on Windows build 1703. The vendor says they are working on the issue.</td>
</tr>
<tr>
<td>Atlas</td>
<td>Some Atlas applications will not open in Edge.</td>
</tr>
<tr>
<td>Cisco AnyConnect VPN</td>
<td>When upgrading from Windows 7 / 8 / 8.1, uninstall the Cisco AnyConnect VPN client first, otherwise wireless network may no longer function.</td>
</tr>
<tr>
<td>Edge</td>
<td>There is no Active-X support as well as no plug-ins allowed, notably Java and Silverlight; Some Atlas applications will not open in Edge.</td>
</tr>
<tr>
<td>Certaid/Internet Explorer</td>
<td>When downloading Certaid with Internet Explorer, users will encounter the error &quot;signature is corrupt or invalid&quot;. Downloading with Firefox or Chrome is advised as a workaround.</td>
</tr>
<tr>
<td>MATLAB</td>
<td>If you receive an error during installation, a reboot may be required before the installation will complete.</td>
</tr>
<tr>
<td>MIT SECURE Wireless</td>
<td>After upgrade to Windows 10 unable to connect to MIT SECURE wireless. See: <a href="#">Windows 10 Upgrade, will not connect to MIT SECURE</a></td>
</tr>
<tr>
<td>SOLIDWORKS</td>
<td>2014 does not work, 2015 needs SP5 - <a href="#">SolidWorks system requirements</a></td>
</tr>
