How do I transfer calls from a VoIP phone to another VoIP phone?

Q: How do I transfer calls from a VoIP phone to another VoIP phone?

Answer

Do the following:

1. During a call, tap the Transfer button located in the row of four buttons along the bottom edge of the screen.
2. Dial the number you want to transfer the call to.

After you finish dialing, the phone waits for awhile because it can't tell that you're finished dialing and is waiting to see if you will continue dialing.

1. You can wait it out or press the Transfer button to send the call now.
2. When you hear the other side ring (or answer), press the Transfer button again to complete the transfer and disconnect your side.
