How do I connect to eduroam on an iOS device?

For other systems go to: Eduroam Landing Page

Answer

1. From your iOS Home screen go to Settings and select Wi-Fi.
2. In the Wi-Fi Networks screen, under Choose a Network..., select eduroam.
3. You will be prompted for a username and password. Enter the full email address of your school. MIT users should enter their Kerberos username with "@mit.edu" on the end:
4. Leave the Mode: Automatic.
5. Accept the certificate prompt in the next window.
Certificate details are at [Eduroam Certificate Fingerprints](https://example.com).

6. Your school username and school password will be sent to your school for verification. If they work, your wifi will connect.
