I forgot my password, can I have it reset?

First, please make sure you are using the correct password. Your Kerberos password may be different than the password you normally use to log in or check your e-mail if you have a departmental account (such as @sloan.mit.edu, @csail.mit.edu, @math.mit.edu, @plant.mit.edu, etc).

If you're sure you need your password reset, there are multiple options:

**Self-Service Password Reset**

In order to use the Self-Service Password Reset, you will need 1 of the following:

- **A valid certificate**
  - If you have a valid MIT personal certificate installed, and want to reset the password, you can reset your password online by visiting Change Your Kerberos Password (it is the second option on the page.)

Be sure you have cookies enabled or you'll get unknown user error messages.

- **Push-Enabled Duo Two Factor Authentication Device**
  - If you have a Push-Enabled device enrolled in Duo, and want to reset the password, you can reset your password online by visiting Change Your Kerberos Password using Duo Push

**Visit the IS&T Service Desk**

If you've forgotten your (Athena/Kerberos) password and/or are trying to obtain a new certificate, The IS&T Service Desk can reset your password in the IS&T Service Desk Walk-in Support Center in E17-106 M-F, 8AM - 5PM.

You must have a valid Photo ID in order to have your password reset by IS&T. Picture ID is required so that they can verify your identity and make sure they are resetting the right person's password. Valid ID's include MIT ID, driver's license, state ID card, military ID, or passport.

**Contact the Service Desk from Off Campus**

If you are unable to stop by building E17, please email a selfie with you holding a photo ID.

Please be sure the name and photo on the ID are clear and please do not cover any part of your face with the ID. Also include your Kerberos username and a phone number we can use to reach you. Email it to accounts@mit.edu.

(If you send us a driver's license, please redact the license number and birth year - that's considered sensitive information and we don't want to keep it!)

**Lincoln Laboratory**

If you are located at Lincoln Laboratory, please visit this web page http://llwww-archive/Resources/LLID/kerberos-pw.html (this URL only works when accessed from a computer at Lincoln Laboratory), or contact the Lincoln Lab Technology Group at 781-981-4357 or help@ll.mit.edu

Additionally, due to the difficulty of verifying users' identities at Lincoln Lab, the staff at the Workforce Service Center, WSC, will be allowed to verify a user in person on our behalf. They will notify us that the user was properly verified.
The list of people allowed at LL WSC to verify users is:

- D. Mark Sprague
- Colleen Campbell
- Kristen Thompson
- Patricia Shwab

Password Requirements

Whichever method you choose, please keep in mind the following requirements regarding secure passwords:

1. The password must be equal to or greater than 8 characters.
2. It must have at least 2 character classes. Character classes that can be used are capital letters, lower case letters, numbers, symbols, and punctuation marks.
3. It must not be one of the three previous passwords you have used.
4. It must not be a commonly used dictionary word (however, a pass-phrase, i.e., more than one dictionary word strung together, is a good version of a strong password, as long as it cannot be easily guessed).

For more information and recommendations on changing your password, please read this article on Strong Passwords.

If you have questions about the password resetting procedure, please contact servicedesk@mit.edu or call us at 617-253-1101
