Troubleshooting Certificates in Internet Explorer

Troubleshooting Certificates in Internet Explorer

- This article presents a list of certificate-related errors that can occur in Internet Explorer 7 and 8, on Windows XP, Windows Vista and Windows 7, and links to their solutions.

- On this page:
  "Your browser failed to generate a key"
  No certificate installed
  "There is a problem with this website's security certificate"
  "An unexpected error has occurred"

Click on the images to go to related articles.

"Your browser failed to generate a key"

Get an MIT Certificate

Steps: 1. 2. 3.

"No certificate installed"

If you don't see your name listed, in the Choose a digital certificate dialog, obtain an MIT personal certificate

"There is a problem with this website's security certificate"

"An unexpected error has occurred"
An unexpected error has occurred. This is often caused by a problem with your MIT personal certificate. See the documentation for instructions to Resolve Certificate Issues to Access SAPweb.
