Find your Version

1. Open the CrashPlan app (see below if you’re not sure how).
2. From the menu bar for your operating system:
   - Windows: Help > About Code42
   - Mac: CrashPlan > About Code42
   - Linux: Help > About Code42

Result: A window opens that will display your name, Kerberos username, machine name and the version of Crashplan/Code42 you are running.

Opening the CrashPlan App

MacOS

- Search for "CrashPlan" using the spotlight and start it from there.
  
  or

- If you have added CrashPlan to your Menubar, click on the CrashPlan icon > Gear icon > Open Code42

Windows

- Open Crashplan from the Start menu. Look for "Code42 CrashPlan"
Use the search box to find “Code42 CrashPlan”
