**External publishing of class content**

MIT OpenCourseWare (OCW) presents an opportunity for you to extend your impact by sharing your own course materials and teaching methods with the world. You've invested many hours in preparing and teaching your MIT residential course. Our baseline publication process for faculty requires very little from you beyond what you have already done. To begin, please contact us at ocw@mit.edu or 617-253-7913.

web-consult@mit.edu

Web publishing consultation

MIT community members in search of web, database, and systems integration services may email questions to Ops Help
ops-help@mit.edu to learn more. If IS&T is unable to offer direct assistance, a vendor or another team at MIT may be suggested. If you need additional assistance with your web site, Communication Production Services (CPS) http://web.mit.edu/cps/ is available to provide advice on design, content strategy, branding and social media, an ever-expanding library of photos, as well as vendor referrals.

Blogs & Wikis: ||

Wiki service

Wikis and similar collaborative applications have come to be standard workplace and educational tools. IS&T offers a wiki space to groups via a centrally-managed wiki application. The MIT Wiki Service uses a product named Confluence from Atlassian Software.

Custom Blogs

Blogging has become a standard technique for workplace and educational communication. IS&T provides the MIT community with a free hosting service via Drupal Cloud. In addition to the creation of custom websites, Drupal cloud provides an easy-to-use blogging feature.
