Manually enrolling your iPad into the Student Loaner Program

This process is only required for specific international students who received email from IS&T directing them to this page. All other participants in the Student iPad Loan Program should follow the instructions on the Student iPad Loaner Enrollment Process page.

- Power on your iPad and go through the initial setup. See Apple's documentation here for more info: https://support.apple.com/en-us/HT202033
- From the home screen of your iPad, launch Safari from the dock
- In Safari, type this URL into the address bar: https://casper1.mit.edu:8443/enroll
  Result: you'll see a login web page
  
  ![Login to enroll your device](image)

  - Enter your kerberos username and password, then click Log In
  Result: you'll see the "Assign to user" page
On the Assign to User page, enter your kerberos username again. In the site menu, change it from "None" to "Student Loaner Program". When done, click Enroll.

- You will be prompted to install the CA certificate. Click Continue
- Safari will ask you to allow it to download a configuration profile. Click Allow.
- Go back to your home screen and launch the Settings app.
In the left side, click on the “Profile Downloaded”.
You will be prompted to install the certificate profile. Click install.
When you've finished installing that, go back to Safari and click Continue to install a second profile.
You will again be asked to allow downloading this second profile.
Go back to the Settings app, and again click on “Profile Downloaded” on the left.
Click install and go through the verification screens until you see the Done button.
Click Done. Enrollment is now complete and you should see Self Service appear on your home screen within a few minutes.
