The `hdtop5-new` macro inserts a panel on a page that displays a simplified RSS feed of the top five articles labeled with the tag `ist-top-five` . It is called from the `sidebar` macro, which pulls in different sets of sidebar panels depending on which page it is on. The `hdtop5-new` is currently displayed on the Knowledge Base home page. It is called with code like this:

```
{hdtop5-new}
{contentbylabel:ist-top-five|showLabels=false|maxResults=5|sort=modified|
reverse=true|showSpace=false|space=mitcontrib,glossary,handbook,ist,istcontrib}
{hdtop5-new}
```

from the `sidebar` macro. This macro is not usually used by article authors.
