

# How do I change my password?

## Q: How do I change my password?

### Answer

This most commonly refers to an MIT Kerberos account password.

See [this article](#) for self-service instructions on resetting your Kerberos password, or obtaining help from the Service Desk.

*Your MIT Kerberos account password is also sometimes called your MIT email password, Athena password, or MIT network identity password.*

### Other password questions

Less commonly, this question can refer to changing other passwords:

- [How do I change my Data Warehouse password? \(certificate required\)](#)
- [How do I reset my password for a TSM backup node name account?](#)
