

Each time I download a file in Firefox it saves to my Desktop. Is there a way to change the default location to where files will be saved?

Q: Each time I download a file in Firefox it saves to my Desktop. Is there a way to change the default location to where files will be saved?

Answer

Windows:

In Firefox, go to **Tools > Options**, then select **Downloads**. For "Save all files to this folder", change the location by clicking on the **Browse** button.

MacOS:

In Firefox, go to **Firefox > Preferences > General**. In the Downloads section, you can change where it saves files to by clicking on the **Choose** button.
