How do I uninstall Spirion (formerly Identity Finder) for Mac?

Q: How do I uninstall Spirion (formerly Identity Finder) for Mac?

Context

- For users looking to remove Spirion (formerly Identity Finder) completely.
- For users looking to remove Spirion as part of trouble shooting the application.

Requirements

· Administrator account

Answer

- 1. Download the Spirion removal script.
- 2. Move or copy the file "UninstallIDF.sh" to the Desktop.
- 3. Open Terminal.app (found in /Applications/Utilities).
- 4. From the command line, issue the command: sudo bash ~/Desktop/UninstallIDF.sh
- 5. When prompted, authenticate with your administrator password and hit the "Return" key.
 - a. Note: You will not see any screen output as you type your password.
- 6. Follow the instructions to completely remove Spirion (and user preferences, if desired) from your system.
- 7. Although not required, a system reboot is recommended.
