Making caller ID Restricted when calling outside from a VOIP phone

Making caller ID Restricted when calling outside from a VOIP phone

When calling outside of MIT and you would like to activate the caller ID to come up "Restricted" instead of your name and number.

Before calling Press *61 then hang up and make your call the Caller ID outside will show Restricted

To cancel Press *65 then hang up. Now when you dial it will show your name and number as the caller ID.
