

I'm using Emacs over telnet using NCSA Telnet and the control keys don't function properly.

Q: I'm using Emacs over telnet using NCSA Telnet and the control keys don't function properly.

Answer

In NCSA Telnet:

1. Go to **Edit / Preferences/ Sessions**.
2. Click the **Change** button.
3. Make sure the fields "Interrupt," "Suspend," and "Resume" are blank.
4. Click **OK**.
