

# Downloaded SAPgui report on Mac - error when opening

## Downloaded SAPgui report on Mac - error when opening

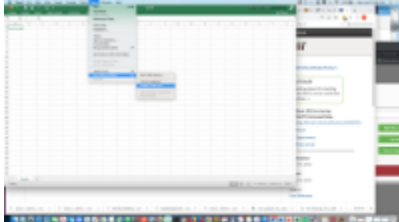

Q: I downloaded a report from SAPgui on Macintosh, but when I try to open it, I get an error that the file may be corrupt.

## Answer

### Option 1 - Use the Text Import Wizard

1. Open a new Excel document
2. From the **Data** menu, select **Get External Data >> Import Text File**

3. Select the report file that you downloaded from SAPgui.
4. In the Text Import Wizard, select **Delimited**, then click **Next**

5. Select **Tab** and click **Next**

*Result:* The file opens in Excel
