How do I edit who has access to my wikis.mit.edu space?

Q: How do I edit who has access to my wikis.mit.edu space?

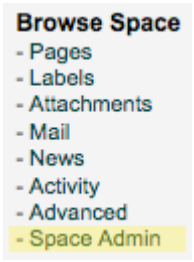

- How do I edit who has access to my wikis.mit.edu space?

Context

- Confluence space on wikis.mit.edu
- Giving a group or individual access to a space on wikis.mit.edu
- Navigating the **Browse** interface in Confluence

Solution

While navigating the page your are setting up permissions for, look for a link titled **Browse**. This link can be in different places depending on the theme applied to your space. Here are a few screenshots of what the link might look like:

Default Theme	Clickr Theme	Left Navigation Theme	MIT Standard Theme
			

The link might be found in the top right on a top nav bar, in a left-hand navigation bar, or in the page footer depending on your applied Theme.

1. Click on the **Browse** link
2. Find the **Space Admin" link (note that on some themes you can jump there directly, but in most you need to go to *Browse Space** first, and then click on **Space Admin**
3. On the **Space Admin** page, click on **Permissions** (looks like this: ) in the left-hand navigation bar
4. Use the **Permissions** page to add users or groups to the list of people who have access to your space

NOTE: In order for the user to be added (found) they need to have logged into wikis.mit.edu previously otherwise the user(s) will not be visible to the Admin within the space.
