Jamf Pro - Mobile Device Management Mail Configuration

Jamf Pro - Mobile Device Management Mail Configuration

You can configure your mobile device in Jamf Pro for email with a configuration profile. To do this log in to the JSS and go to your mobile device site and do the following:

1. Select **Configuration Profiles**.
2. Click **New**.
3. Under *General* give the profile a name such as "Email."
4. Assign a category.
    - Select the **Distribution Method**.
5. Click **Exchange ActiveSync** and then configure the settings as in the image below.

6. Save your profile and assign to devices as desired.
