

# What is the file size limit in Stellar?

## What is the file size limit in Stellar?

The file size limit is 250MB. Usually files of this size tend to be audio or video files. If clients want to add files larger than 250MBs to their site, then they will need to contact Academic Media Production Services (AMPS) using the contact information found on this page: [MIT Video Production](#).

If these are video files, other options include [Youtube](#) and MIT Dropbox for Business, and linking to those files from Stellar.
