

How can I print from SPLUS?

How can I print from SPLUS?

To print from Splus, use the command:

```
postscript(file="/tmp/filename.ps")
```

substituting a name for filename. Then use the commands you would normally use to generate the plot. To save the plot into the file, type:

```
graphics.off()
```

This will generate the file "/tmp/filename.ps", which you can print with the lpr command from the athena% prompt:

```
lpr -Pprinter /tmp/filename.ps
```

where "printer" is the name of the printer where you want to print it.
