How can I print a high-resolution graph in SAS?

How can I print a high-resolution graph in SAS?

The recommended way to print a high resolution graph is to use ASSIST. Before you start SAS,

```
setenv PRINTER printername
```

(where printername is the printer you want to send it to)

1. Start "ASSIST" from the globals menu, and select **graphics**, **high resolution**, then the type of plot you want.
2. Click on **Graphics Device** in the window that you use to create the graph, then click on **hardcopy device**
3. Select **printers**, then Choose the option labled **Postscript Devices PS**
4. Create the graph.
5. Select **Print** from the **File menu** of the SAS:GRAPH window
