How do I change my password?

Q: How do I change my password?

Answer

This most commonly refers to an MIT Kerberos account password.

See **this article** for self-service instructions on resetting your Kerberos password, or obtaining help from the Service Desk.

Your MIT Kerberos account password is also sometimes called your MIT email password, Athena password, or MIT network identity password.

Other password questions

Less commonly, this question can refer to changing other passwords:

- How do I change my Data Warehouse password? (certificate required)
- How do I reset my password for a TSM backup node name account?
