How can I access the Merriam-Webster dictionary from Athena?

How can I access the Merriam-Webster dictionary from Athena?

- The Abridged Merriam-Webster dictionary is freely available online at http://m-w.com.
- In addition to online resources, the GNOME Dictionary program is available under the Applications menu in the Office catgeory, or from the command line as
  `gnome-dictionary`
- The `webster` program in the SIPB locker also provides a text-based interface to the dictionary. To use it:

1. Add the sipb locker by typing the following at the athena% prompt:
   `add sipb`
2. Then, to lookup a specific word, enter a command of the form:
   `webster word-to-look-up`
3. To go into interactive mode and look up several words, one at a time, you could type just:
   `webster`
4. For more information on the `webster` program, view its manual page.
