

How do I reset licensing information in X-Win32?

Q:How do I reset licensing information in X-Win32?

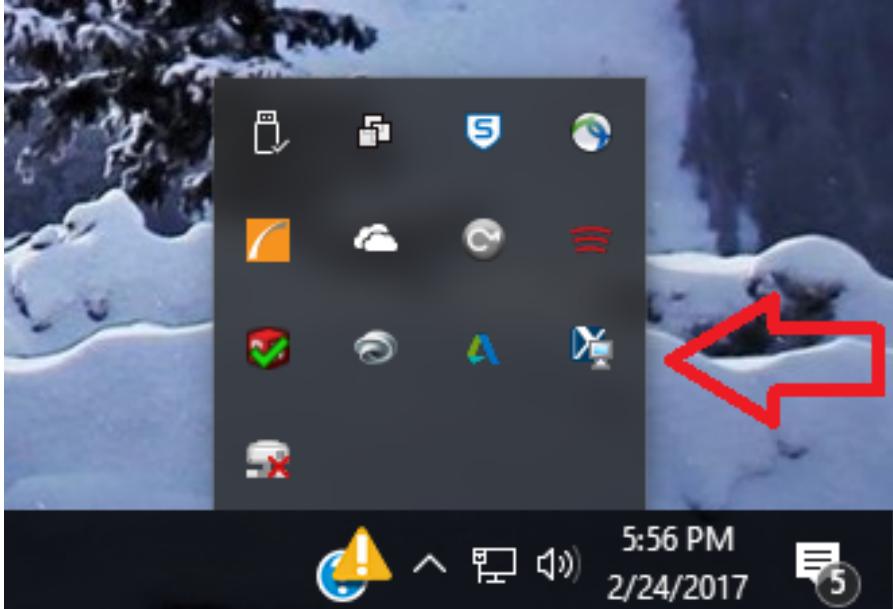

- This article will instruct users on updating or editing standalone license information in an existing installation of X-Win32

Context

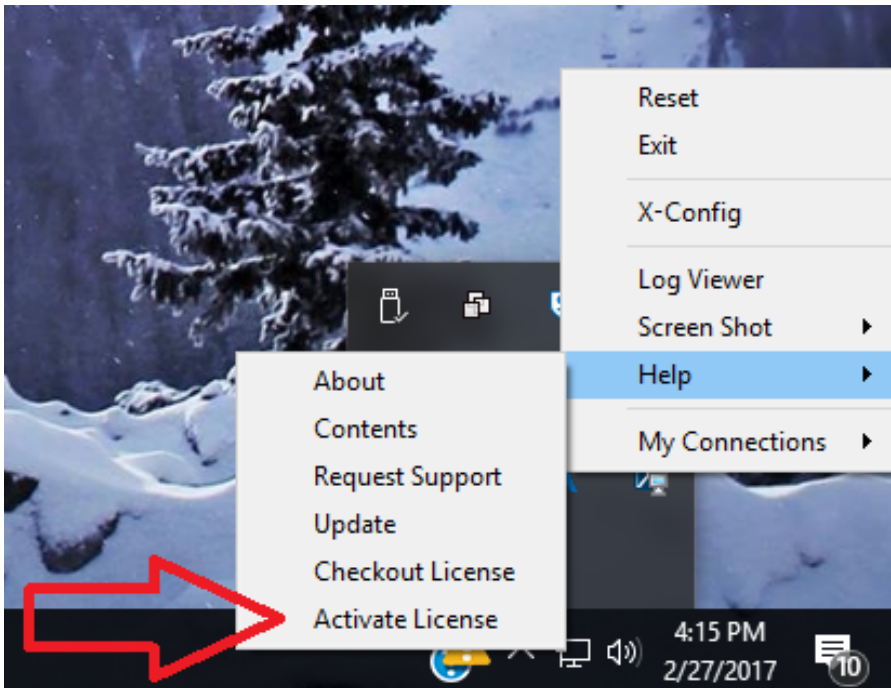

- Starnet's X-Win32 is an advanced PC X server and X emulator that runs on Windows Machines

Answer

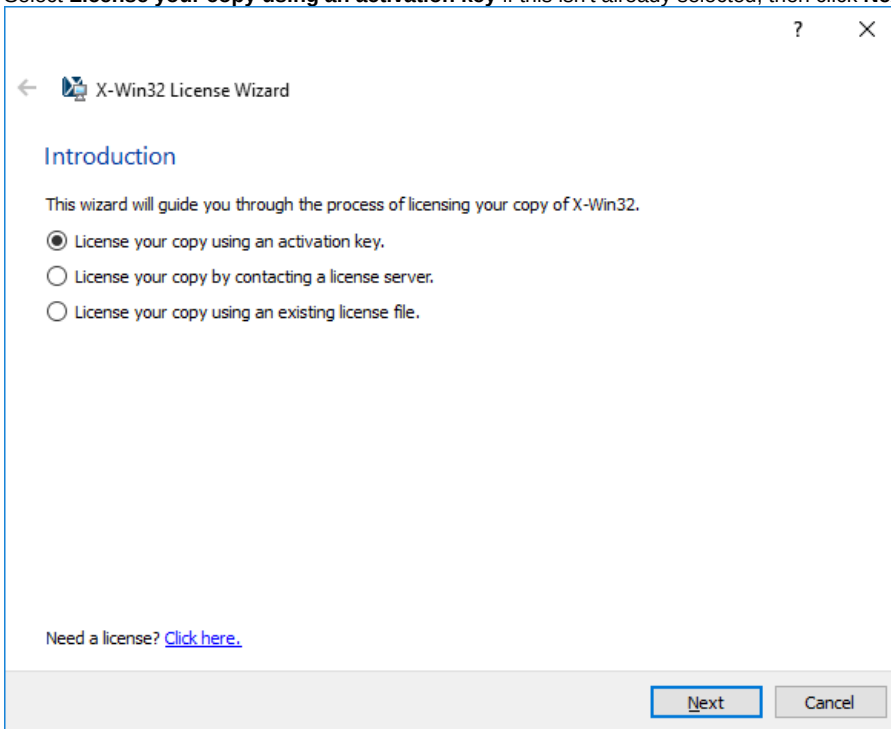

1. Launch X-Win32 if you haven't already done so and make sure the **X-Win32 logo** is visible in the Windows System Tray.

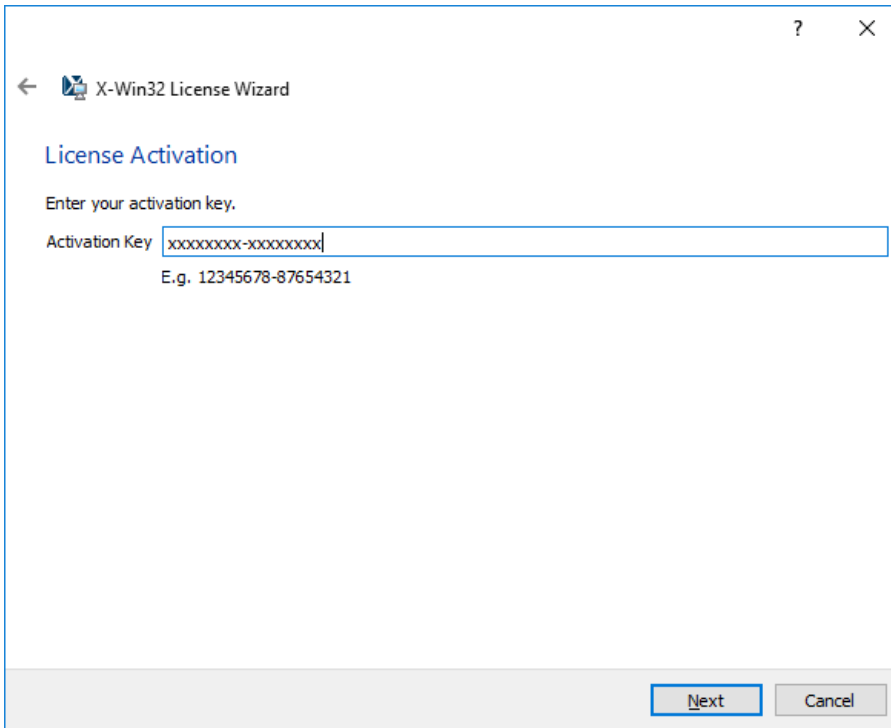

2. Right-click on the X-Win32 logo and Select the menu **Help -> Activate License**.

3. Select **License your copy using an activation key** if this isn't already selected, then click **Next**.

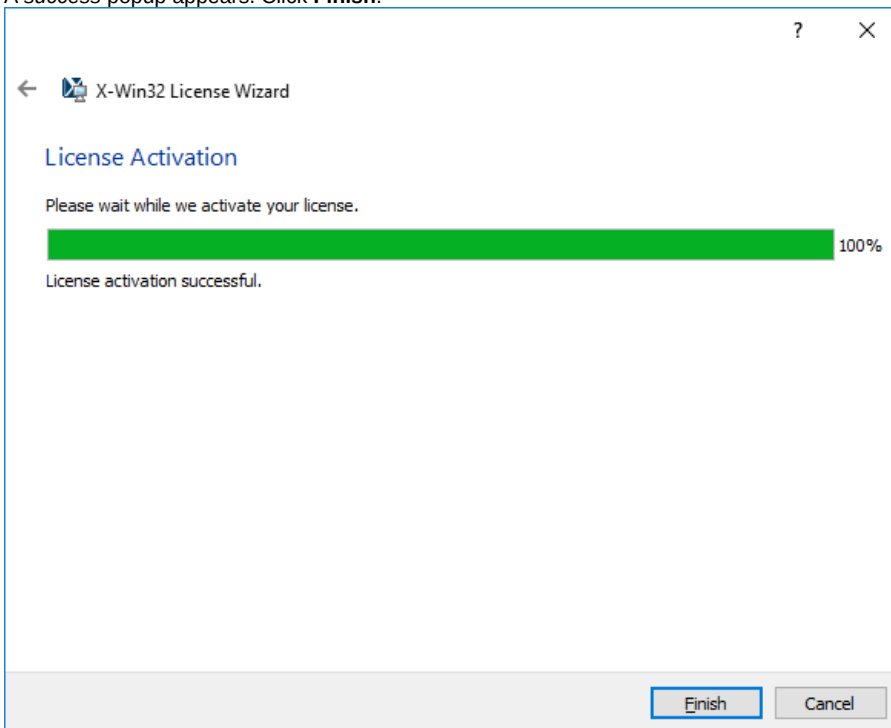

4. Enter the activation key and click **Next**.

The screenshot shows the 'X-Win32 License Wizard' window. The title bar includes a back arrow, the application icon, and the text 'X-Win32 License Wizard'. The window has standard Windows window controls (minimize, maximize, close) in the top right corner. The main content area is titled 'License Activation' and contains the instruction 'Enter your activation key.' Below this is a text input field labeled 'Activation Key' containing the placeholder text 'xxxxxxxx-xxxxxxxx'. An example key 'E.g. 12345678-87654321' is shown below the input field. At the bottom right, there are two buttons: 'Next' and 'Cancel'.

5. A success popup appears. Click **Finish**.

The screenshot shows the 'X-Win32 License Wizard' window at the 'License Activation' step. The title bar and window controls are the same as the previous screen. The main content area displays 'Please wait while we activate your license.' followed by a green progress bar that is 100% full. Below the progress bar, it says 'License activation successful.' At the bottom right, the buttons are now 'Finish' and 'Cancel'.

Result: your license information has been updated

 Your license information is stored in file %LOCALAPPDATA%\StarNet Communications\X-Win32\license.lic
