Why didn't I get a Spam Notification message today -

Q: Why didn't I get a Spam Notification message today -

> ⚠️ **Redirection Notice**
> This page should redirect to [Why didn't I get a Spam Notification message today?].

Answer

There are a few reasons this can happen:

- **You had no spam yesterday.** If no mail is identified as spam and quarantined, you will not receive a Spam Notification message.

- **You set up automatic mail filtering** for your Spam Notification messages. Check any filters you have set up on the server or with any local mail clients to find out where you routed your Spam Notification Messages.
