What moira lists are synchronized with the knowledge base?

Q: What moira lists are synchronized with the knowledge base?

- What moira lists are synchronized with the knowledge base?
- How are moira lists synchronized with the knowledge base?
- How do I know if knowledge base groups have updates recently?

Context

- the knowledge base and help system
- Moira lists / groups feeding into the knowledge base

Answer

- All the lists in `/home/hermes/acl/acl.conf` on the Knowledge Base server (`kb.mit.edu` should get updated from their moira equivalents
- To check when they were last updated:
    - `add consult`
    - `lastupd acl | grep -i logios`

Content of `acl.conf` file

```
# Mapping of files to confluence groups
#
# Format:
#
# myfile.acl=confluence-group-name
#
# Lines with comments are ignored
#

admin.acl=confluence-administrators
