How can I print a high-resolution graph in SAS?

How can I print a high-resolution graph in SAS?

The recommended way to print a high resolution graph is to use ASSIST. Before you start SAS,

setenv PRINTER printername

(where printername is the printer you want to send it to)

- 1. Start "ASSIST" from the globals menu, and select graphics, high resolution, then the type of plot you want.
- 2. Click on Graphics Device in the window that you use to create the graph, then click on hardcopy device
- 3. Select printers, then Choose the option labled Postscript Devices PS
- 4. Create the graph.
- 5. Select Print from the File menu of the SAS:GRAPH window
