

Atlas error message - "No RFC authorization for function group ZCO SAFO"

Atlas error message - "No RFC authorization for function group ZCO SAFO"

Question

I am a student, trying to accomplish financial reporting for a student group. I am receiving an error message:

```
RFC_ERROR_SYSTEM_FAILURE: User has no RFC authorization for function group ZCO_SAFO.
```

Other messages can also signal this same issue; [see below](#) for other possible error messages.

What does this mean?

Answer

- This error message indicates that you do not have reporting authorization for SAP.
- Authorizations are required in order to access the Student Group reports available from [Atlas](#)
- Student reporting authorizations must be renewed yearly, as they expire each year at the end of June.
- Requests for authorizations for student group accounts or questions about student group reporting should be sent to the Student Organizations, Leadership & Engagement team, via email to sole@mit.edu.

For more information, see: <http://studentlife.mit.edu/sao/finance>
