SDM

SDM

The SIS Data Maintenance (SDM) Application was developed by Education Systems to replace some of the legacy Oracle Forms that make up Mitsis. Non-complex MITSIS Oracle Forms that are used in the business areas of Housing, Dining, Registrar and Student Financial Services were chosen to be converted to a web based form and have been made available through the new SIS Data Maintenance (SDM) Application.

Users who have access to Mitsis Oracle forms by default will have view access to the SDM application and SDM converted forms.

Mitsis Forms converted to SDM

SDM Frequently Asked Questions

some additional forms were added to SDM in the CIM Courses project ... https://kb.mit.edu/confluence/display/istcontrib/SDM+Forms
