Video Recording and Delivery - Subtitles and Transcripts

Adding subtitles and creating transcripts

Providing subtitles and transcripts for your videos makes them [accessible to hearing-impaired viewers](#), makes understanding the content easier for non-native speakers, and enhances discoverability of your content by revealing it to search engines such as Google. While YouTube makes system-generated subtitles available on some videos, the quality of these subtitles is extremely low and will not meet the needs described above.

Note: Lecture transcriptions created for hearing-impaired students during a course are generally not made available for use as part of a video. For more information, see [accessibility](#).

[External Services](#)

MIT Services

There is currently no MIT service for automatic subtitling and transcribing.

An ongoing project available for experimentation is SpokenMedia, an umbrella project for the development of tools and services to enable rich media notebooks for learning and teaching. SpokenMedia focuses on automatically creating a text transcript from lecture video (with potential integration in larger media production workflows), a video player with a video-linked transcript (and other interactive features), and a transcript editor.

- Learn more about SpokenMedia, including format specifications at <http://spokenmedia.mit.edu>

Do-It-Yourself Options

Many programs are available to create and synchronize subtitles manually. These options work well for videos under ten minutes in duration; manually creating subtitles for an entire lecture will be time consuming.

Universal Subtitles

Universal Subtitles provides free, open tools for creating and reviewing subtitles - collaboratively or on your own.

- Learn more at <http://universalsubtitles.org>

External Services

Video transcription is a large and growing business, and many companies will be happy to transcribe and subtitle your videos for a (sometimes substantial) fee. OCW has worked with [3Play Media](#) to transcribe and subtitle some of their videos.

[Return to Teaching with Technology](#)

The logo for ACCORD: Teaching With Technology. It features the word "ACCORD:" in a bold, yellow, sans-serif font, followed by "Teaching With Technology" in a smaller, yellow, sans-serif font. The text is set against a dark gray rectangular background.
