TSM 6.3.1 for OS X - Installation

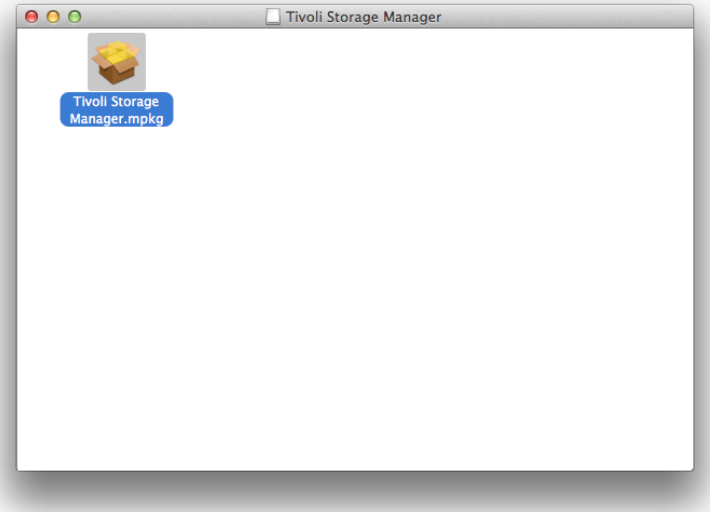

TSM 6.3.1 for OS X - Installation

Note: During installation, you may need to enter your TSM node name and server name. You can find this information in the email confirmation from the Help Desk of your TSM registration.

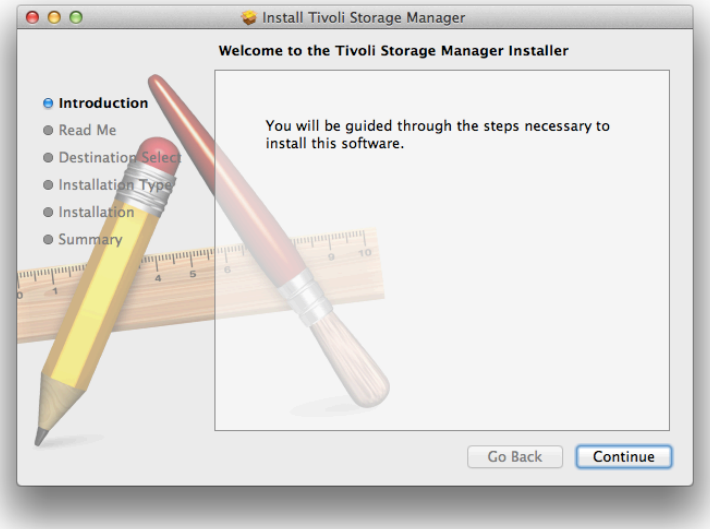

1. Go to the TSM 6 for Mac download page on the IS&T Software Grid. (Certificates required.)
   Result: The file containing the TSM 6 installer downloads as "6.3.1.0-TIV-TSMBAC-Mac.dmg".

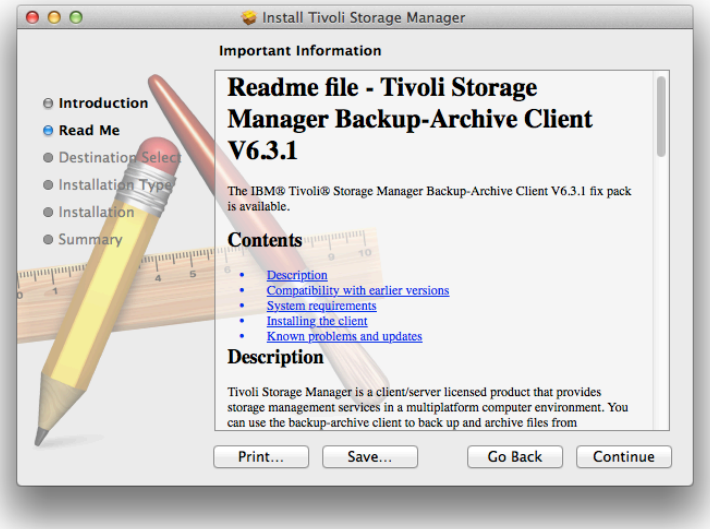

2. Open the disk image file and double-click on the **Tivoli Storage Manager.mpkg** package to start the installation.

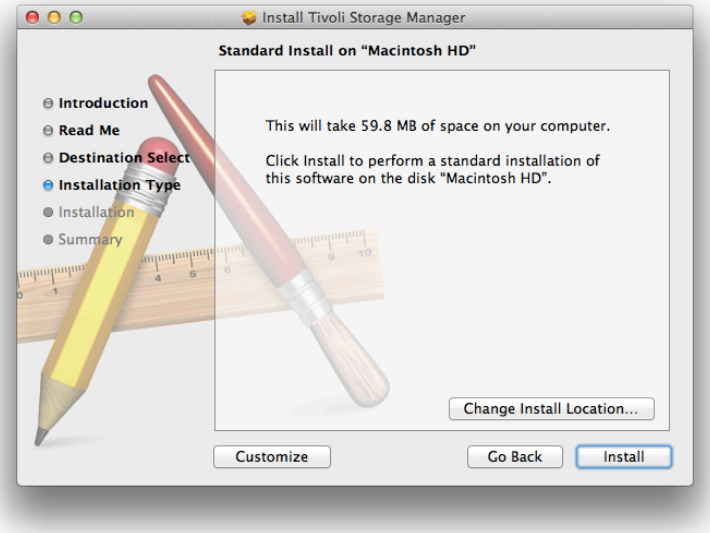

Note: If you are running OS X 10.8 (or Mountain Lion) and you are blocked from running the TSM installer, you should use these directions to bypass the Gatekeeper security settings and allow the installer to run.
Result: The *Welcome to the Tivoli Storage Manager Installer* screen appears.

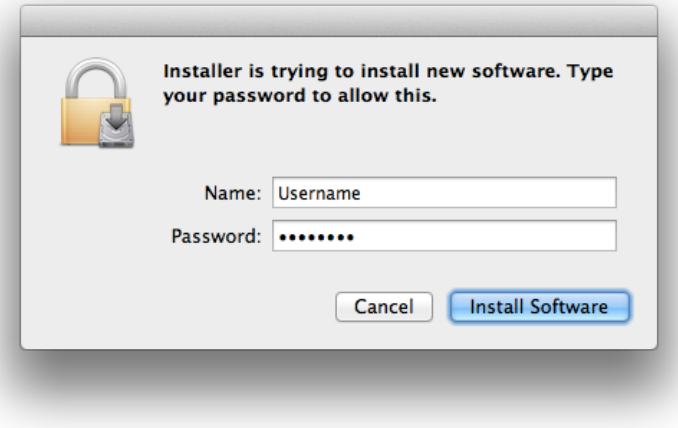

3. Click **Continue**.
   Result: The Readme file appears. This file will be installed in your **Applications > Tivoli Storage Manager** folder.

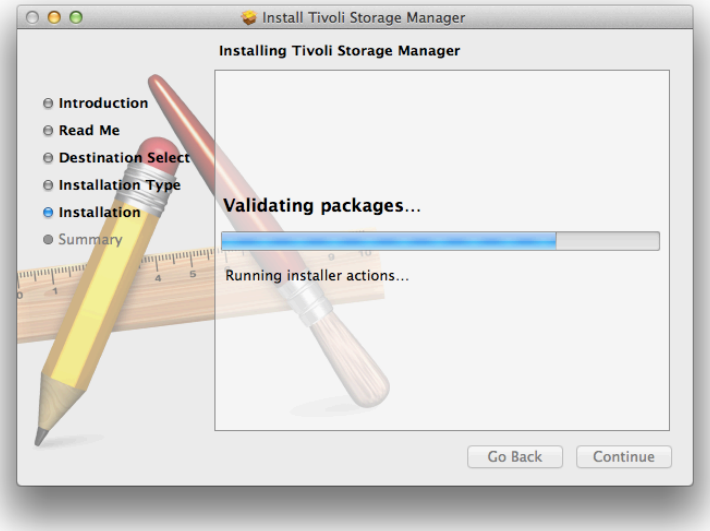

4. Read, print, or save the Readme file, then click **Continue**.
   Result: The *Standard Install on Macintosh HD* screen appears.

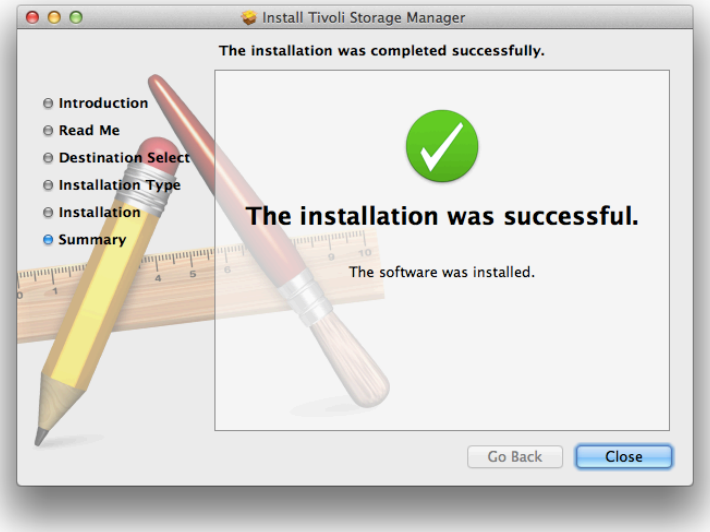

5. Click **Install**.
   Result: You are prompted to enter your Macintosh user name and password.

6. Enter your Mac Administrator username and password and click **OK** or **Install Software**.
   Result: TSM will now install.

Result: A confirmation screen tells you that the software was successfully installed.

7. Click **Close** to exit the TSM installer.

For additional information about TSM, consult the MIT TSM readme file in the Tivoli Storage Manager folder.

If you have questions, contact the IS&T Help Desk.
