

How to remove Stellar Course Calendar (Beta)?

Q: How to remove Stellar Course Calendar (Beta)?

Answer

If you subscribed to your Stellar Calendar (Beta) by clicking on the **Subscribe to Calendar (Beta)** button on either You@Stellar or on a specific course, you can unsubscribe by removing that linked calendar from Outlook or Apple Calendar. Please keep in mind this is *BETA* functionality and may be imperfect.

Removing Stellar Calendar Sync from Outlook

1. Open your Outlook Calendar
2. Find the **Other Calendars** section, usually on the left hand side under the 2 months
3. Find **Stellar Course Calendar** and right click on it
4. Select **Delete Calendar**
5. Click **Yes** if you really wish to remove this calendar.

The entries should no longer appear on your calendar in Outlook.

Removing Stellar Calendar Sync from Calendar on Macs

1. Open **Calendar.app**
2. clicking on "Calendars" in the upper left of the window
3. Scrolling down to "Other" calendars (it may show up in iCloud depending on where you added it)
4. Find "Stellar Course Calendar"
5. Select the line by clicking to the left of the check box. (it should highlight the Stellar Course Calendar line only)
6. Unsubscribe by deleting the calendar using the Command-Delete.

The entries should then be removed from your calendar and you will not see additional entries from Stellar.
