Q: Setup Dreamweaver CC for SFTP access to mit.edu

If you have a prior version of Adobe CS Suite installed, IS&T recommends that users follow [Adobe's Adobe Creative Cloud Cleaner Tool instructions](#) prior to attempting installation of this Adobe Creative Cloud application.

Effective Thursday, June 13, 2019, [Duo two-factor authentication](#) is required to access athena.dialup.mit.edu via secure shell (SSH) or secure file transfer (SFTP/SCP). As Dreamweaver does not support two-factor authentication for file transfer, you will need to use [another file transfer program](#) to upload your files to Athena lockers.
