

# How do I reset licensing information in X-Win32?

## Q:How do I reset licensing information in X-Win32?

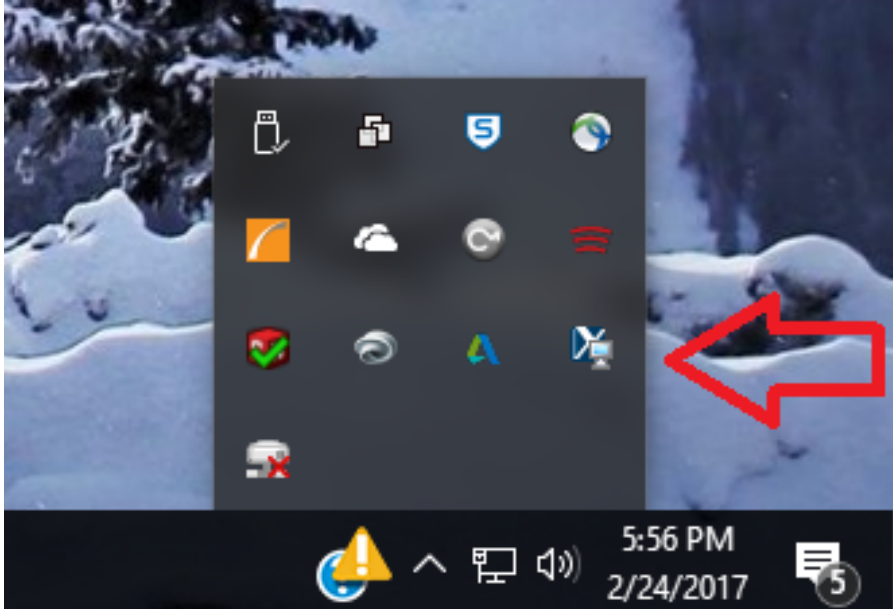

- This article will instruct users on updating or editing standalone license information in an existing installation of X-Win32

### Context

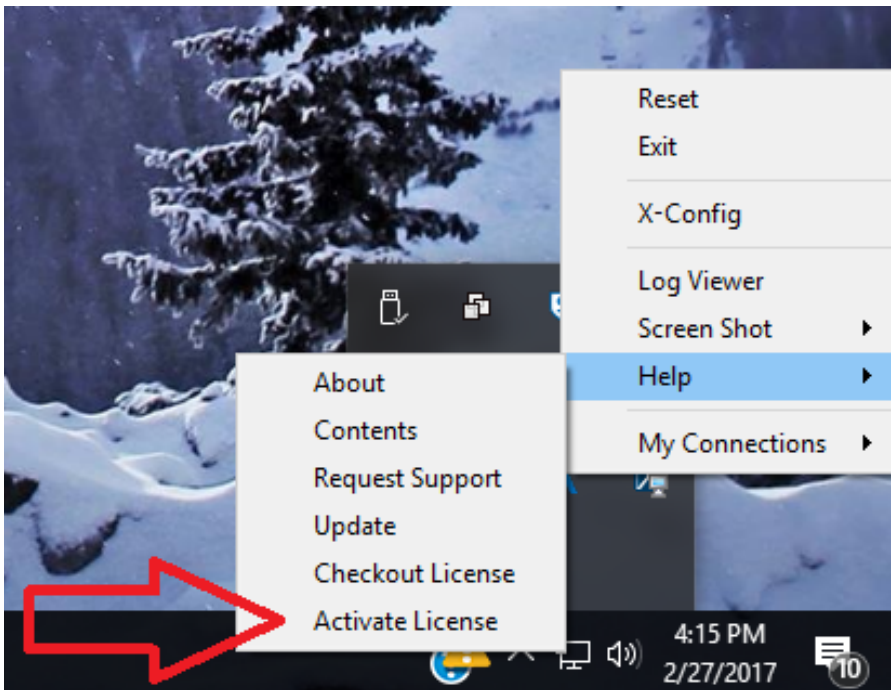

- Starnet's X-Win32 is an advanced PC X server and X emulator that runs on Windows Machines

### Answer

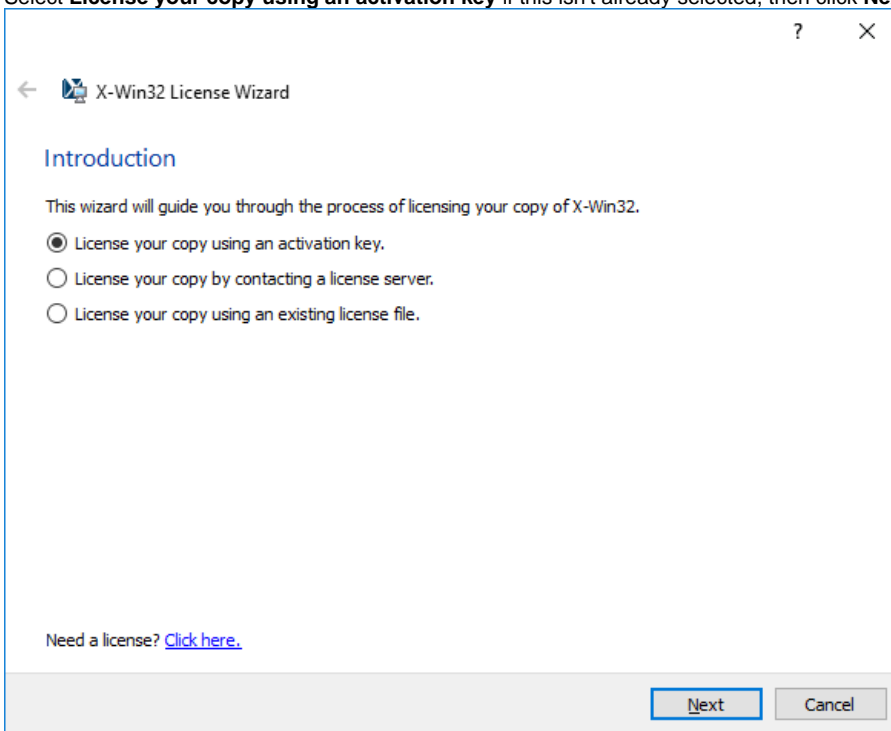

1. Launch X-Win32 if you haven't already done so and make sure the **X-Win32 logo** is visible in the Windows System Tray.

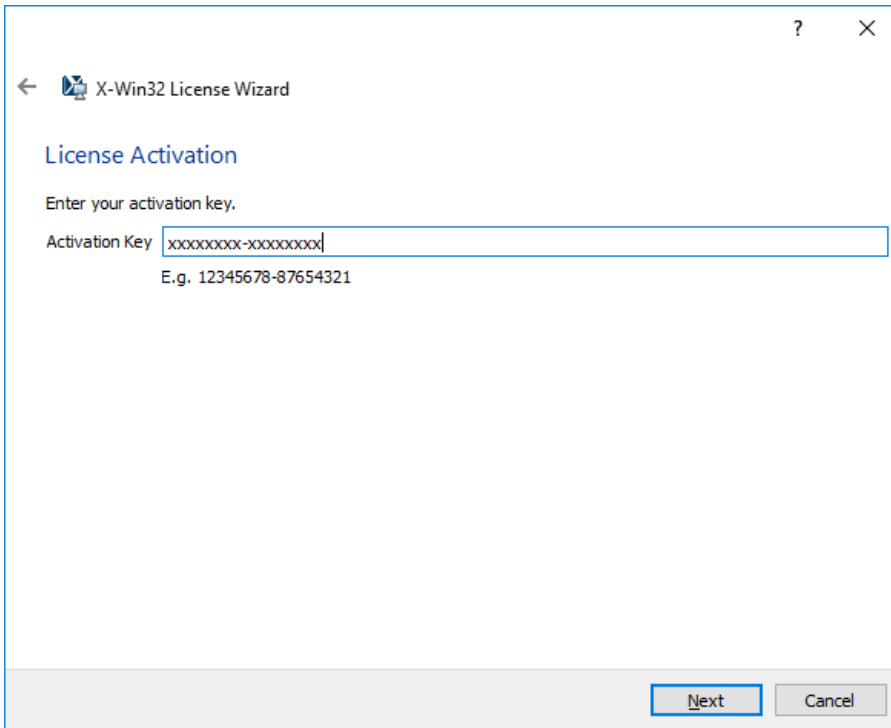

2. Right-click on the X-Win32 logo and Select the menu **Help -> Activate License**.

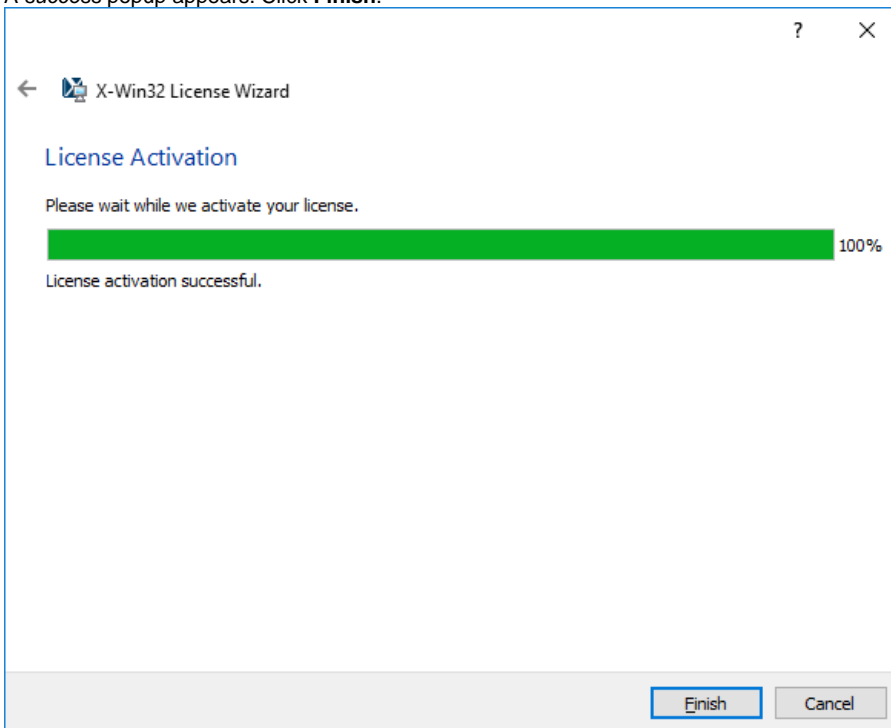

3. Select **License your copy using an activation key** if this isn't already selected, then click **Next**.

4. Enter the activation key and click **Next**.

5. A success popup appears. Click **Finish**.

*Result:* your license information has been updated

 Your license information is stored in file %LOCALAPPDATA%\StarNet Communications\X-Win32\license.lic
