

# When I will be out of the office, how do I set up email auto-replies on MIT's Exchange service?

**Q: When I will be out of the office, how do I set up email auto-replies on MIT's Exchange service?**

## Answer

To turn on auto-replies with Exchange, you'll need to use an Exchange email client to tell the Out of Office Assistant to send automatic responses while you're away.

**Use Outlook Web App (OWA) to set up Out of Office email auto-replies:**

1. Log in to [Outlook Web App](#).
2. Click on the gear icon in the top right corner of the screen and select "Options" from the dropdown menu.
3. Select **Organize Email > Automatic replies**.  
*Result:* The Automatic Replies settings screen appears.
4. Toggle on **Send automatic replies**.
5. Enter your message in the field provided below the text "**Send a reply once to each sender inside my organization with the following message**". It is the first text entry box. See: [Q: What should I put in my Out of Office message?](#)
6. If you choose to send automatic replies to those in your contacts list or all external senders, click "**Send automatic reply messages to senders outside my organization**" then choose either "**Send replies only to senders in my Contacts list**" or "**external senders**".
7. If you chose to **Send to all External senders**, you need to enter a message in the field provided below the text "**Send a reply once to each sender outside my organization with the following message**". If the external senders option is checked, there must be a message within the field or senders outside of MIT will not receive it.
8. Click the **Save** button at the bottom of the page.

**Warning:** The Out of Office assistant may reply to mailing lists in some instances. This is not an issue with Mailman mailing lists. IS&T recommends using Mailman mailing lists to avoid out of office messages being sent to list members. For more information about mailing lists and how to get a Mailman list, see: [Email Lists at MIT](#).
