Add signature to emails in Thunderbird

Add signature to emails in Thunderbird

How do I add a signature to my emails in Thunderbird?

The instructions are the same for Thunderbird on every OS. (As of Thunderbird v2.0.0.9)

You can create a signature file in Wordpad or Word and save this as a text or html file to your desktop or other folder.
(Do not save it as a Word document, TB does not recognize the format!)

Then open Thunderbird,

1. Go to **Tools > Account settings**.
2. Click on the **Choose** button in the **Attach this signature** section and browse to the desktop or other folder where you saved the signature file.
3. Choose this file and click **OK** to close the **Tools** window.

Now this signature will be added to your outgoing emails.
