How can I include the bibliography in the table of contents of my thesis?

How can I include the bibliography in the table of contents of my thesis?

To get LaTeX thesis templates to include the bibliography in the table of contents, you need to use the "bibcontents.sty" file. To do that, type (from the directory where your thesis files are):

```
attach consult
 cp /mit/consult/lib/tex/macros/bibcontents.sty .
```

Then add the line

```
\usepackage{bibcontents}
```

after your \documentclass line.
