TSM 6.4 for OS X - Installation and Configuration

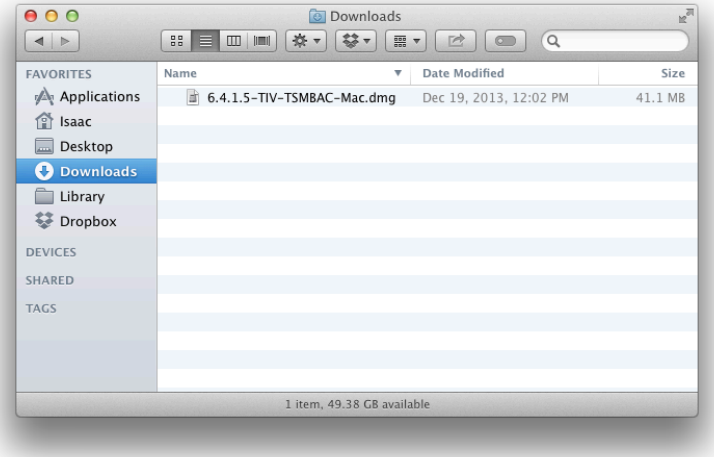

TSM 6.4 for OS X - Installation and Configuration

On this page:

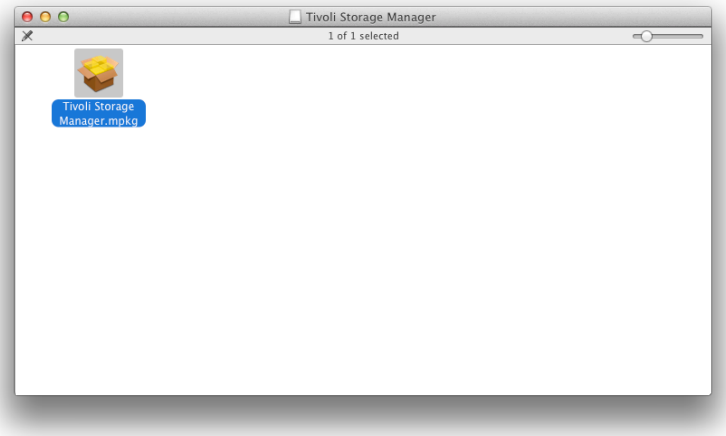

Installation
Configuration
More Information

Installation

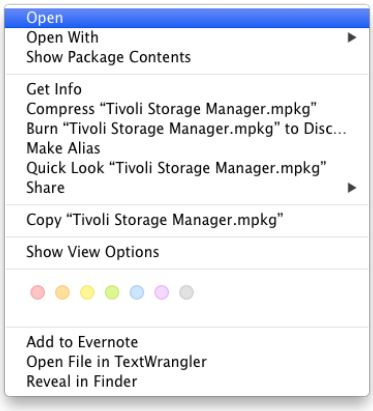

1. Go to the TSM 6 for Mac download page on the IS&T Software Grid. (Certificates required.)
   Result: The file containing the TSM 6 installer downloads as "6.4.1.5-TIV-TSMBAC-Mac.dmg".

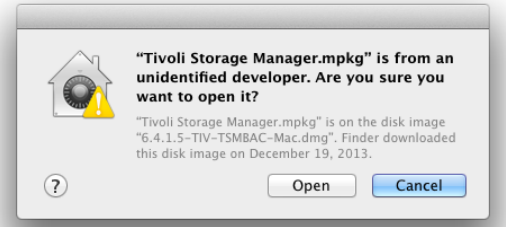

2. Open the disk image file and double-click on the **Tivoli Storage Manager.mpkg** package to start the installation.

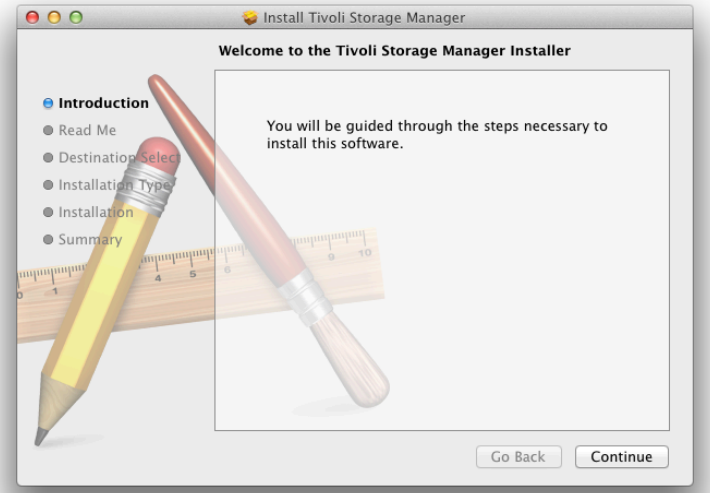

3. The TSM installer package will be blocked by Gatekeeper, to open the installer Control-click or right click the icon and click **Open**.

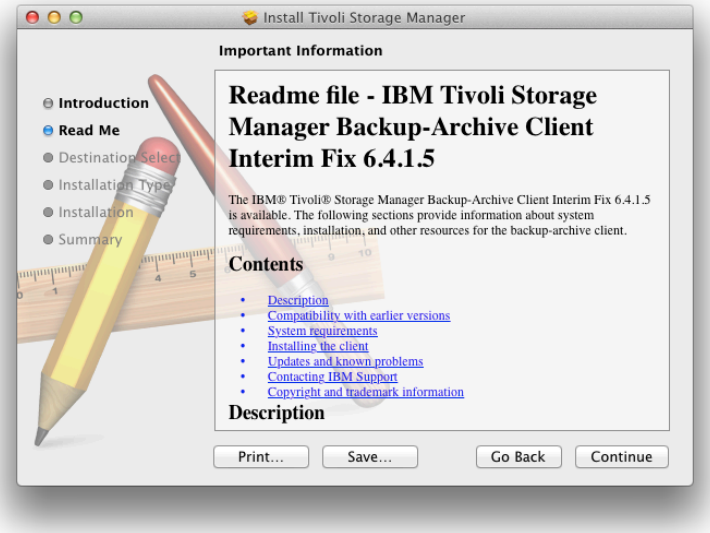

4. Gatekeeper will confirm that you intend to install the application, click **Open.**

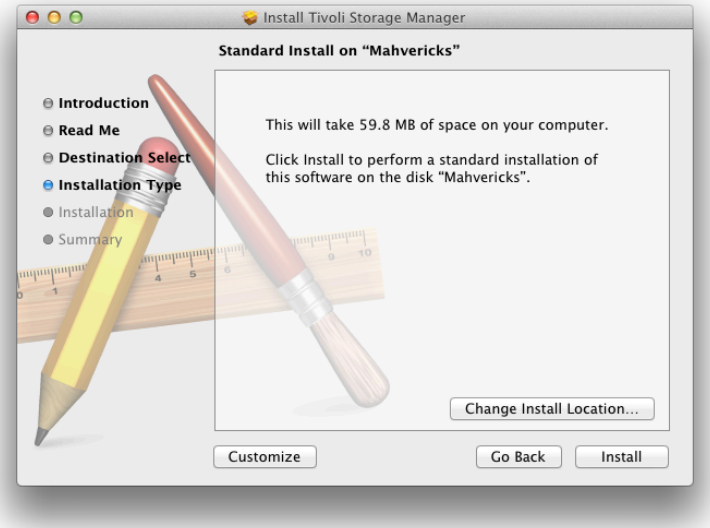

Result: The *Welcome to the Tivoli Storage Manager Installer* screen appears.

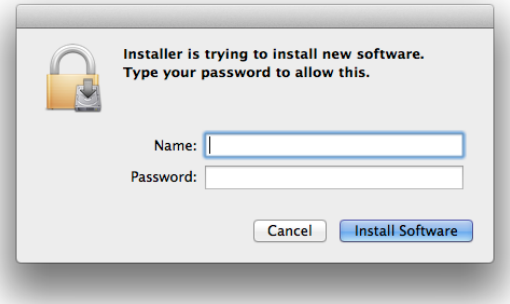

5. Click **Continue**.
   Result: The Readme file appears.

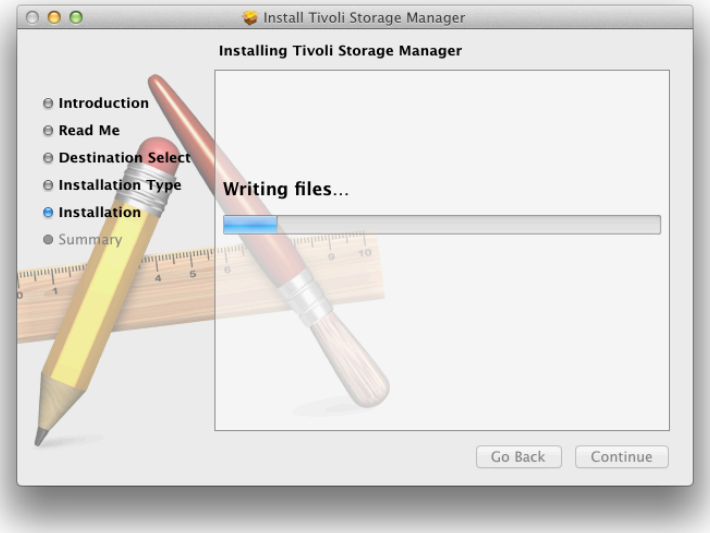

6. Read, print, or save the Readme file, then click **Continue**.
   Result: The *Standard Install on Macintosh HD* screen appears.

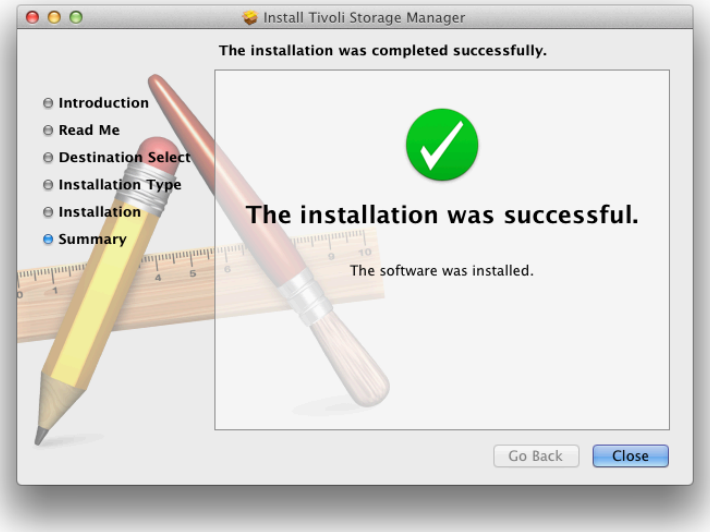

7. Click **Install**.
   Result: You are prompted to enter your Macintosh user name and password.

8. Enter your Mac Administrator username and password and click **OK** or **Install Software**.
   Result: TSM will now install.

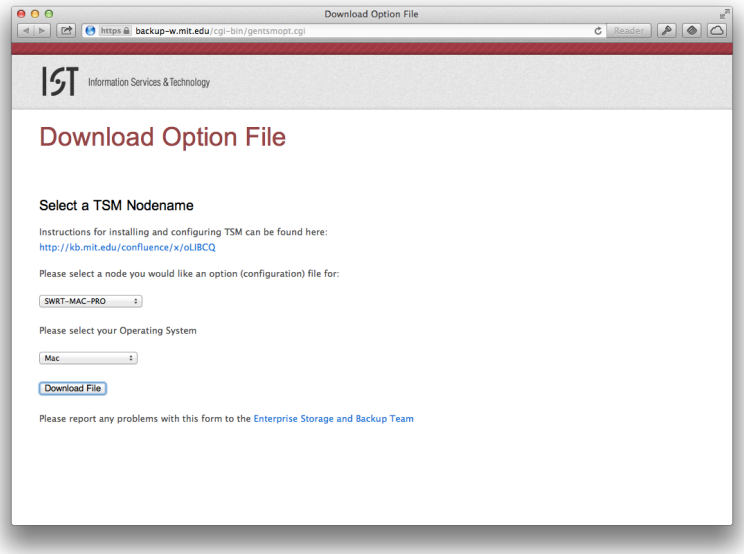

Result: A confirmation screen tells you that the software was successfully installed.

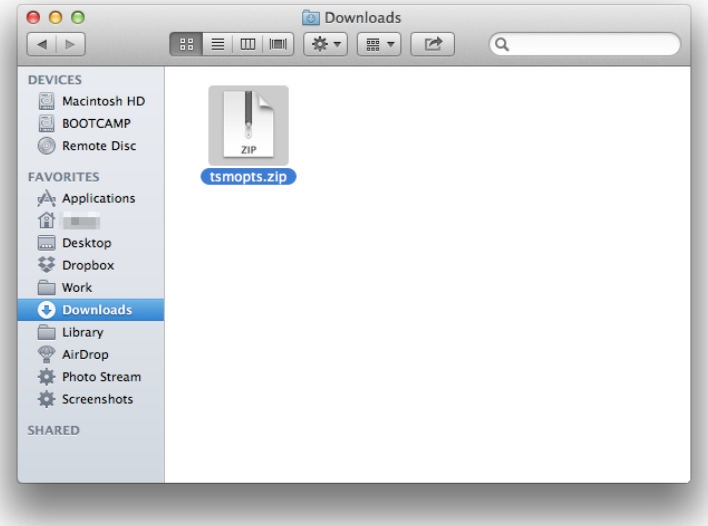

9. Click **Close** to exit the TSM installer.

Configuration

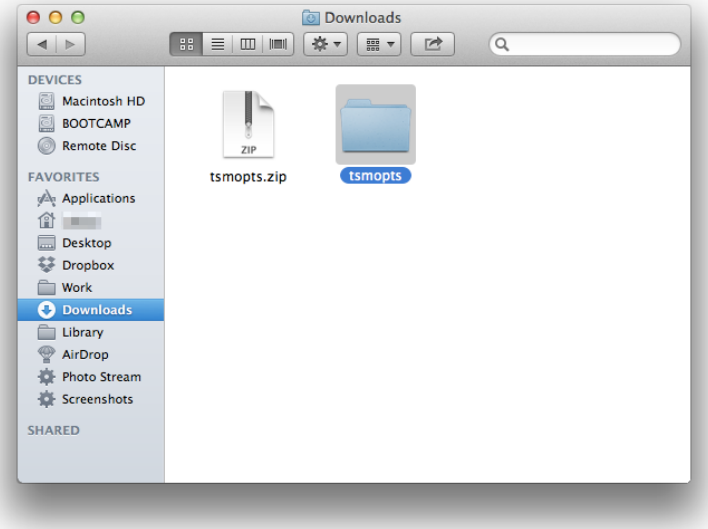

1. Go to the TSM Download Option File page, select your TSM nodename OS and click **Download File**.

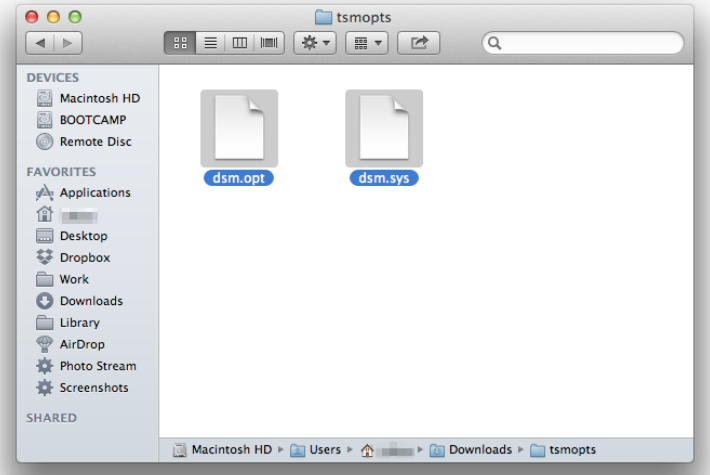

Result: The file containing the TSM 6 options files downloads as tsmopts.zip.

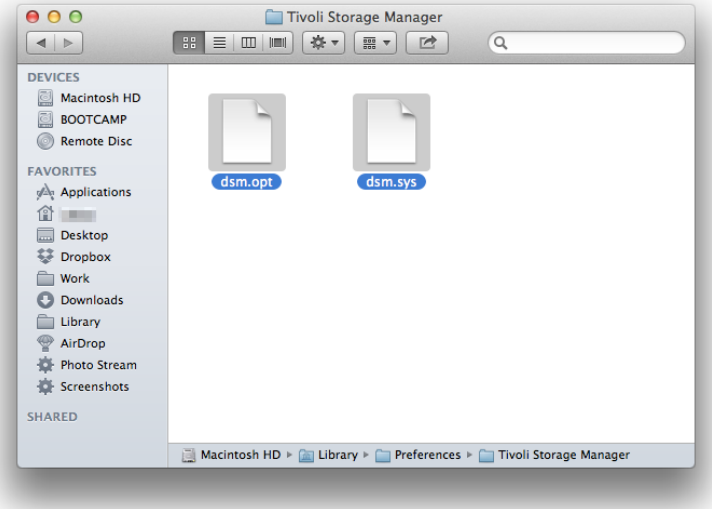

2. If the .zip file does not unzip itself, double-click the .zip file to extract the contents. Double-click on the new **tsmopts** folder.

3. Select the two files inside this folder named dsm.opt and dsm.sys.

4. Move these two files to the `/Library/Preferences/Tivoli Storage Manager` directory on your Mac (as seen in the video linked below).

Result: You have completed the installation and configuration of TSM on your Mac.

Configuration video (QuickTime is required.)

Note: Be sure you are putting the files in the Root Library. Start from the **Computer** (under the **Go** menu) then go to **Macintosh HD** then to **Library**.
