Overview

Cisco's AnyConnect Secure Mobility Client is a Virtual Private Network (VPN) client that works on a wide variety of operating systems and hardware configurations. For more information about VPNs, see: [Virtual Private Network at MIT](#). The new Cisco AnyConnect Secure Mobility Client and service will work under Mac OS X, Windows, and Linux. There are also device-specific versions for many common mobile devices such as iPad, iPhone or Android phones.

Note: You must have an active connection to the Internet and an [MIT Duo enabled device](#) before proceeding.
