How do I connect to eduroam on Mac OS X 10.9 or later?

How do I connect to eduroam on Mac OS X 10.9 or later?

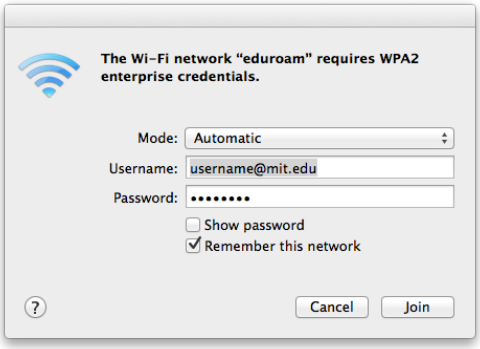

For other systems go to: Eduroam Landing Page

Answer

1. Select **eduroam** as the wireless network of your computer.

2. You will be prompted for a username and password. Enter the **full email address** of your school. MIT users should enter their Kerberos username with "@mit.edu" at the end:

3. In certain cases, these situations may arise:
   - If your Macintosh has not yet encountered the certificate that encrypts the connection, it may show a window allowing you to examine the certificate.
     Certificate details are at at Eduroam Certificate Fingerprints.
     Press **Continue** to go on.

   - Your Mac will ask for your Mac password in order to trust the MIT eduroam certificate. Enter your Mac password. Click **Update Settings**.

4. Your school username and school password will be sent to your school for verification. If they work, your computer will successfully connect to eduroam.
