Unable to see View Dollars button when distributing salary for hourly staff

Unable to see View Dollars button when distributing salary for hourly staff

Question

In the Atlas eSDS application, when viewing salary distribution for exempt staff, I click on the ID number and see editable distribution text fields. There are three buttons: Save changes, Return or View dollars. When I select View Dollars, I see the monthly distribution. For support staff and students, the View Dollars button is not displayed. Why?

Answer

There is no view dollars function for hourly-paid staff because the view dollars function is a projection tool and the Institute does not project hours to be worked in the future.
