# Where can I find a sample resume in LaTeX?

## Where can I find a sample resume in LaTeX?

A resume template can be found on-line in the file:

```
/mit/sipb/examples/latex-resumes/resume-sample.tex
```

To copy this file to your current directory, type:

```
attach sipb
cp /mit/sipb/examples/latex-resumes/resume-sample.tex .
```

The '.' is important; it means "current directory". If you leave it out you will receive an error message, as the "cp" command will not know where to copy the file to.

In the same directory you can find many other example of resumes. Feel free to look around!

**NOTE:** If you would like more guidance on writing a resume, stop by the Office of Career Servies in 12-170. They have annotated examples in their free "MIT Careers Handbook", as well as other resume-writing resources. Members of that office will be happy to critique your resume before you put it in final form.
