

Benefits Enrollment not appearing in "View My Benefits"

Benefits Enrollment not appearing in "View My Benefits"

The "View My Benefits" link in [Atlas](#) now has functionality for inputting a date.

The screenshot shows a web interface with a light beige background. At the top, the text "Plan participation as of" is followed by a date input field containing "11/09/2009" and a small calendar icon. Below this, there is a blue button with white text that reads "View Printable Summary".

For new employees, if you have elected to have your benefits begin on the first day of the upcoming month, enter that date, then click "View Printable Summary".

For changes made during Open Enrollment, change the date to January 1 of the upcoming calendar year.
